with built-in multiple sockets –  
mobile and convenient

**... for faster patient mobility**

**... a cost-saving solution**

 medela®

# Medela Thorax Drainage System

**The modular system  
for efficient thoracic drainage**

## ■ Safe and mains-free operation

You need constant prolonged suction for drainage. Thanks to its safety knob, the Vario Low Vacuum aspirator supplies constant vacuum and, with its battery, operates safely and mains-free.

## ■ Environmentally friendly and economic

You want to decide whether to use a 1 or 2 chamber system? You prefer reusable components? With the Medela water seal there are only a few sterile disposable components. This reduces the environmental impact as well as the costs significantly.

## ■ Mobile and practicable

You want to mobilise your patients quickly? You can mount the Vario and the additional devices that are required, such as infusion pumps, on the trolley and connect them to its multiple sockets. This means there is only one cable to unplug and your patient is immediately mobile.
